

.....

Sleeve joining machine is designed for assembling pipes with sleeve couplings

The SJM machine is usually placed near the pipe hydro-testing machine to allow the timely assembling of the pipe and sleeve coupling.

SJM3000 main characteristics

Machine operators requirement (workers per shift)

1 machine operator

Pipe diameter and length

Diameter: 300 – 3,000 mm

Length: up to 13,500 mm

Machine dimensions

Length: 16 m

Width: 3.3 m

Height: 3.9 m

Utilities requirements

Max. installed power: 5 kW
